

I am totally against Docket - 020277 (Broadcast Ownership). This would make an already bad situation worse. There needs to be more diversity in Broadcast Ownership not less. I cannot understand why the FCC would change policy from years past, when the airwaves were considered a public resource. Of course when the FCC commissioners are taking bribes, excuse me ,I mean junkets paid for by media corporations they are supposed to be regulating then maybe it is understandable,that they are a bunch of crooks, and belong in prison
